Welcome to **Begin³⁰** HOLISTIC WELLNESS PROGRAM

Did you know that emerging science is showing that a balanced gut microbiome may be **foundational to helping support your overall wellbeing?**

In fact, the gut is now being commonly referred to as the **second brain of the body!** And that's because, far beyond just helping with your digestion, scientists believe a balanced gut microbiome can **help positively impact our overall wellbeing** by helping **support our immune health, healthy weight, healthy sleep and so much more!**

The Nutrilite™ Begin 30 Holistic Wellness Program combines lifestyle habits like regular exercise, a plant-forward diet, proper hydration and daily mindfulness practice to support overall health and wellbeing, plus intentionally selected nutrition supplements to **help promote gut health and a balanced microbiome.** Scientific research has shown that these healthy lifestyle habits are a key part of promoting the **healthy function of your liver and kidneys, promoting good sleep, controlling hunger and cravings, encouraging a healthy metabolism, increasing energy levels and even maintaining a healthy weight.**

Holistic wellness begins in the gut

How gut health supports holistic health and wellbeing

Did you know that your gut may be referred to as your second brain? That's because it plays a central role in making sure your body functions well through digestion, nutrient absorption and metabolism. Emerging science is showing links between the gut microbiome and the immune system, skin health, liver health, oral health and more! By caring for your gut, you also help support overall health and wellbeing.

A healthy gut starts with plants

Evolving our founding philosophy

More than **90 years ago**, the founder of the Nutrilite™ brand observed firsthand the importance of a plant-based diet for overall health. Shortly after, Nutrilite supplements **came to life**. Since then, we have **focused on harnessing Earth's most powerful nutrients** to support you with vitamins and supplements made with ingredients from **plants grown on our own farms** and partner farms.

Today, emerging science supports our original ethos, suggesting that a diet rich in plant-based foods supports holistic wellness by encouraging a more diverse, resilient gut microbiome.

Essential fuel for a balanced microbiome

It's no surprise that our diets impact our gut health, but what should you eat? And how do you give your gut microbiome the support it needs? By eating lots of plants!

With the Nutrilite Begin 30 Holistic Wellness Program, we've distilled our years of expertise and commitment to plant-based ingredients into a **program fueled by holistic wellness habits**, including a plant-forward diet and supplements to **support your gut health**.

During the program, your diet will emphasize high-fiber, plant-forward foods like fruits, vegetables and legumes. You'll also aim to eliminate artificial and processed foods, alcohol, sugar and saturated fats.

Gut with the program

Kick-start your Nutrilité™ Begin 30 Holistic Wellness Program journey with a plant-forward diet consisting of whole fruits and vegetables, and supplement your nutrition with **Nutrilité Begin Daily GI Primer**, **Nutrilité Organics Plant Protein Powder** and **Nutrilité Balance Within™ Probiotic** to support your gut wellness.*

NUTRITION

Consume a **plant-based, antioxidant-rich diet** with limited sugar, fat and processed ingredients.

HYDRATION

Drink **at least half your body weight (lbs) in ounces of water** a day and consume high-water foods.

EXERCISE

Walk **7,000–10,000 steps** every day and **exercise 75 minutes or more a week**.

MINDFULNESS

Do activities such as meditation, diaphragmatic breathing or yoga to **practice mindfulness 1–2 times per day**.

Nutrition

The food you eat is a crucial factor in influencing the gut microbiome.

Many factors in daily life affect the gut microbiome, with diet having one of the most powerful influences. Modern lifestyles impact the delicate balance of our gut microbiome. That is why it is important to be proactive in supporting and promoting good bacteria and a balanced gut.

Studies have shown that people who consume more than 30 different plants per week have a more diverse and resilient gut microbiome than people who eat fewer than 10 plants a week.

That's why during the **Nutriline™ Begin 30 Holistic Wellness Program**, you'll aim to consume a plant-based, antioxidant-rich diet with limited sugar, saturated fat and processed foods.

Think GUT-POSITIVE

Your goal throughout the program is to maximize the amount of **GUT-POSITIVE** foods in your daily diet. The more you consume, the better off you are in supporting a diverse, balanced microbiome. We know that being perfect is difficult, though, so as long as 60% or more of your calories come from **GUT-POSITIVE** foods, you're hitting your mark!

Hydration

Staying hydrated is one of the simplest ways to support your gut health. It also supports many other vital processes, including normal kidney function, skin health and regular bowel movements.

During the program, you'll aim to drink at least half your body weight in ounces of water every day in addition to consuming high-water foods like fruits and vegetables. If you use the Wellbeing+ App, your water intake will be further customized based on activity level and diet habits.

The **eSpring™ Water Treatment System** provides cleaner, healthier, better-tasting water by effectively reducing over 170 contaminants that may be present in drinking water, including over 145 potential health-effect contaminants.*

*The eSpring Water Treatment System is designed and intended for use only with potable drinking water deemed safe to drink by local public health authorities.

Exercise

Most people know that exercise has countless benefits for our health, from boosting our metabolism to improving our energy levels, helping us maintain a healthy weight, reducing stress and promoting restful sleep. But scientists also believe that exercise has a positive impact on the resilience and microbial diversity of the gut microbiome.

Aim for 7,000–10,000 steps per day and planned exercise for 75 minutes or more a week. Lots of activities count as physical activity, and you can split it up into 2–3 sessions to make it easier! You can take walks, garden, stretch or even do some house chores. The idea is to just be moving.

Looking for more ways to **ramp up** your workouts? **Amway's XS™ Fitness Program** includes **convenient workouts** led by **professional coaches**.

Mindfulness

Wellness is a two-way street:

Scientists believe that the gut-brain axis may influence not only digestion but also our eating behaviors like cravings, hunger and satiety. There's growing evidence that influencing the gut-microbiota-brain axis may indirectly impact mood, hunger, appetite, satiety, sleep and response to occasional stress.

MEDITATION

**MINDFUL
EATING**

*Practice mindfulness
1–2 times per day
during your 30-day
program.*

Keep calm and sleep on with **n* by Nutrilite™ Sweet Dreams Sleep Gummies** designed to support restful sleep. Plus, add **Nutrilite™ Organics Ashwagandha Capsules** to support stress management and mood.[†]

Get in the headspace

As with any new habit, it will take time to get accustomed to change. Be sure to mentally prepare yourself for the next 30 days, and don't forget to take it one day at a time!

What to expect after the program

Feel the difference that 30 days can make to help you live a happier, healthier life.

of participants who committed to making healthy lifestyle changes for 30 days lost weight.**

6 out of 10 participants reported:

- fewer sleep disturbances.*
- a reduction of occasional digestive discomfort.*
- feeling less hungry during the day.*

*Based on self-reported survey results compared to baseline after four weeks. There was no change in participants' reported sleep score (quality of sleep). Participants were instructed to follow a Mediterranean diet, take at least 7,000 steps per day with a minimum of 75 minutes of cardio or strength exercise per week, drink at least half their weight (lbs) in ounces of water per day and practice mindfulness one to two times daily. Participants also consumed Nutrilite™ supplements during the study, including Nutrilite Balance Within™ Probiotic and Nutrilite Begin™ Daily GI Primer.

**Participants were instructed to follow a Mediterranean diet, take at least 7,000 steps per day with a minimum of 75 minutes of cardio or strength exercise per week, drink at least half their weight (lbs) in ounces of water per day and to practice mindfulness one to two times daily. Some participants reported losing no weight, so there is no guarantee that you will experience similar results. The Nutrilite™ Begin 30 Holistic Wellness Program is designed and intended to promote healthy lifestyle changes, many of which are conducive to safely losing weight or maintaining a healthy weight. The program is not designed or intended for long-term weight loss or weight management.

How you'll feel

Everyone's body is different, so you may not have the exact same experience as others in the program, but here's what you can generally expect:

**Days
1–7**

Stage 1
Initial Phase

Mild or occasional GI discomfort, flatulence and bloating, fatigue, tiredness and occasional nausea.

Though uncomfortable, an immediate physiological reaction is normal, especially as your diet begins to change and you begin exercising more. When you eliminate high-sugar, high-fat foods, it's normal to experience cravings. This temporary setback is a necessary step toward making meaningful changes to lifestyle habits.

NOTE: There is no specific duration for this phase, but most discomfort resolves within 2–3 days from the start date.

Tip: Lean on your IBO and program community for support during this initial phase as you ensure that you hydrate and get enough sleep.
You gut this!

**Days
5–15**

Stage 2

Adaptation to healthy habits

Reduction of GI discomfort and more stable energy levels.

Once your body gets used to your new routines, your initial digestive symptoms should begin to fade and you'll start to really feel the benefits of more exercise, consistent hydration and mindfulness practices.

Tip: Build up to more **physical activity** as you start to feel better.

**Days
15–30**

Stage 3

Improvement phase

Preference for healthy foods, fewer sugar cravings during the day, sustainable energy levels and regular bowel movements.

After adjusting to your new diet and your body's routine, you'll begin to enjoy the benefits of your hard work!

Congratulations!

Now that you've spent the last 30 days building healthier habits, you're ready for the next win. Keep up the good work and build your progress with more from Amway™.

Hint: You can **combine all in a smoothie**, just remember to **gently stir your probiotics in** after you've finished blending your protein and gi primer. For the strongest results, however, it is recommended to take them as directed **throughout the day (See page 11).**

Hydration

During the Nutrilite™ Begin 30 Holistic Wellness Program, you'll drink up the benefits of hydration—literally. Getting enough water is key to a healthy, well-functioning body and mind.

Turn it up

Kick-start your morning by mixing a scoop of Nutrilite Begin™ Daily GI Primer in a glass of cold water to help promote a balanced microbiome.[†]

Increase your water intake when you feel bloated. You may need to increase your water intake when exercising to account for hydration lost through sweat.

Carry a reusable water bottle to sip on throughout the day.

Replace sugary drinks like sodas and fruit juices with water to reduce your total caloric intake.

Flavor your water with fruit infusions and sugar-free enhancers.

Eat foods naturally high in water like fruits and vegetables packed with vitamins, minerals and antioxidants.

The eSpring™ Water Treatment System provides cleaner, healthier, better-tasting water by effectively reducing over 170 contaminants that may be present in drinking water, including over 145 potential health-effect contaminants.*

*The eSpring Water Treatment System is designed and intended for use only with potable drinking water deemed safe to drink by local public health authorities.

Dial it back

Limit caffeine to no more than two caffeinated beverages per day (e.g., one espresso and one cup of tea). Avoid caffeine after 3 p.m. to improve your healthy sleep cycle.

Avoid sodas, fruit juices, lemonade, fruit punches and other sweetened beverages.

[†]This statement has not been evaluated by the Food and Drug Administration. This product is not intended to diagnose, treat, cure or prevent any disease.

Exercise

During the Begin 30 program aim for 7,000–10,000 steps per day and planned exercise for a total of 75 minutes or more a week.

DAILY

Everything counts

- Walking
- Gardening
- Light house chores
- Dancing

Plan ahead and scale up

- Set aside at least 30 minutes each day
- Increase your daily activities by 10 minutes every few days by using every opportunity to be more active
- Use the stairs instead of the elevator, or park your car a little farther away

WEEKLY

Try cardio

- Jogging
- Swimming
- Cycling
- Aerobics

Do strength activities

- Weight lifting
- Pilates

***Find your new favorite workout with
Amway's XS™ Fitness Program!***

*Before beginning any exercise program, consult with a healthcare professional, especially if you suffer from any chronic condition, are pregnant or nursing or are taking any medications. Participate at your own risk. Participating in any exercise or physical activity program carries risk of possible physical injury. You assume all responsibility for any injuries that may occur. Ensure that you perform exercises in a safe environment, wear appropriate attire and follow all safety instructions. Stop activity if you experience pain, dizziness or shortness of breath, or if you experience any new health issues or existing conditions worsen.

Mindfulness

Supporting your mental health can positively impact digestion, eating behaviors, stress resilience and total gut health. Aim for at least 1–2 activities per day.

Mindful eating

- Eliminate distractions
- Eat slowly
- Engage your senses
- Follow your hunger and fullness cues

Meditation

- Write your thoughts in a journal
- Meditate to relax and reduce anxiety

Diaphragmatic breathing

- Inhale to fill your belly with air, hold for three to five seconds, then exhale first from your lungs and second from your belly.
- Try putting one hand on your belly and one hand on your chest to feel each filling with air as you breathe.

Sufficient sleep

- Create sleeping schedule
- Wind down before bed
- Reduce exposure to bright light

SELF-ASSESSMENT

The journey ahead

This self-assessment will help you reflect on your current habits and better understand your wellness baseline.

- Reflect on how you feel about each of the different aspects of wellness.
- Rate each aspect from 1 to 10, with 1 meaning "I struggle with this" and 10 meaning "I feel great" or "I have no problem with this."
- Assign a value by highlighting the corresponding segment from 1 to 10.

Arugula Salad with French Lentils, Smoked Chicken, and Roasted Peppers

Ingredients:

- ½ pound French green lentils
- 14 oz low-sodium chicken broth
- 1 cup water
- 4 sprigs thyme, plus ½ tablespoon fresh thyme leaves
- 2 red bell peppers
- 2½ tablespoons olive oil
- 1 tablespoon red wine vinegar
- 1 tablespoon balsamic vinegar
- ½ teaspoon coarse salt
- 6 oz baby arugula
- 6 oz smoked skinless, boneless chicken breast

45 minutes

6 servings

11 ingredients

Instructions:

1. In a medium saucepan, combine lentils, broth, water and thyme sprigs. Bring to a boil, reduce heat to medium-low and simmer uncovered until lentils are tender. Drain and set aside in a bowl to cool.
2. While lentils are cooking, roast red peppers over a gas flame or under the broiler, turning occasionally until blackened. Place in a heat-proof bowl, cover with plastic wrap and let stand until cool. Peel, seed and cut peppers into ½-inch strips then place in a small saucepan with ½ tablespoon oil. Cover and cook gently over low heat for about 10 minutes.
3. In a large bowl, whisk together vinegars, salt, thyme leaves and remaining 2 tablespoons oil. Add half of the dressing to the lentils and toss to coat. Add arugula, chicken and cooled pepper strips to the remaining dressing and toss.
4. Season both salads with salt and pepper to serve.
