

Artistry Signature Select™ Personalized Serum

NEW

Treat your skin's top 3 concerns in a single serum.

Artistry Signature Select™ Personalized Serum combines the most powerful Nutrilite™ botanicals and advanced Artistry™ skincare technologies to target and treat your unique skin concerns.

Note - The Amplifiers when combined with the base serum provide the clinical results noted for each skin concern, we recommend that you do not duplicate an amplifier but choose up to 3 different amplifiers.

Frequently Asked Questions

How do I mix my personalized serum?

Create your Artistry Signature Select™ Personalized Serum in 3 easy steps:
Start with the Base Serum + 1 Amplifier that targets your top skin concern.
Pick up to 2 more Amplifiers that address your other skin concerns.
Combine to create your custom mix.

How do I mix the Base Serum and Amplifiers?

Hold the Base Serum with one hand, from the top of the bottle so you can see the clear area at the bottom. Add your personalized mix of up to three Amplifiers in this order: Hydration, Anti-Wrinkle, Firming, Anti-Spot, Brightening. Gently twist on (right), then slowly twist off (left). As Amplifier(s) release, you'll hear a whooshing and see ingredients infuse into the Base Serum. When all Amplifier(s) have been added, screw the pump top into place. Because the Base Serum texture is thicker and more cushioning than water, it is essential to vigorously shake the mixture for 60 seconds after Amplifier(s) are infused. However, your serum remains thoroughly mixed after this initial activation, so it is not necessary to shake before each use.

Where does my personalized serum fit into my Artistry™ regimen?

Serums are treatment products, so apply during the treat step, after you cleanse and tone, in both the morning and the evening. For best results, lock in the serum with the Artistry™ moisturizer best suited to your skin's concerns.

Is my personalized serum safe for every skin type?

Yes, all formulas have been dermatologist tested to be safe and gentle for all skin. Testing on groups of individuals with sensitive skin found no evidence of allergic response or extreme irritation, though no testing can guarantee that all individuals who use this product will not have a reaction.

How long will my personalized serum last?

Depending on the number of Amplifiers and pumps per use, your freshly mixed bottle should last 4-6 weeks when used twice a day. For best results, store in a cool, dry place, out of direct light.

How should I store my personalized serum?

Before and after activation, store serum in a cool, dry place, out of direct light. Do not refrigerate Amplifiers before activation. Prior to activation, it is recommended that you store unused Amplifiers with the label upright and readable.
